The new Excalibur Sport with PFM
Smarter, Better, Stronger!

Highlights

**Extreme workload range of 10 - 3000 watt**
This extraordinary peak workload is extremely suitable for sports medicine and testing the strongest athletes on their anaerobic power or isokinetic capacity. Combined with the low start workload of 10 Watt this Excalibur will fit everybody.

**Left and right independent measurements**
The PFM is not only the summation of left and right, but real left and right independent measurements. Differences between the left and right pedal movement, before and after surgery or at different workload can be detected. A real diagnostic tool!

**Measurement every 2 degrees**
The accuracy of the PFM during the total revolution is obtained by the placement of highly specific strain gauges in the crank axis making it possible to measure the pedal force every 2 degrees during each revolution during the exercise test.

Special Analysis and Polar Graphs
Analysis and Polar graphs are specifically designed for pedal force measurement

**LEM PFM included**
The LEM software with PFM module is standard included
The new Excalibur Sport with PFM

Smarter, Better, Stronger!

With its unbeatable accuracy and reliability, the Excalibur Sport has proven itself as The Gold Standard in Ergometry ever since 1985. However, the world keeps spinning and developments never stop. That is why we now proudly present the new Lode Excalibur Sport: Smarter, Better and Stronger! Still true to its heritage but combined with innovative new features to meet the latest and future requirements of modern sports medicine and research to allow athletes to become stronger and better with smarter use of human performance technology.

Versatile ergometer

The new Lode Excalibur Sport ergometer is an essential part of a sports medicine or research lab, since it can be used to test all types of athletes. The ergometer allows for various tests, like a Wingate sprint test, Isokinetic tests, High Intensity Tests (HIT) and time trials. Moreover, it can also be used for CPET testing and bike fitting.

Pedal Force Measurement

This Excalibur sport has built-in modified strain gauge technology that measures forces exerted on the pedals during exercise and is supplied with angle detection. Independent measurements of forces in both left and right crank are possible. Wireless transmission of the measured forces to the PC by bluetooth.

Note: this setting is supplied with a 3,5" control unit, LEM and LEM PFM software (various other modules are available), a computer (we recommend to use this PC only for the LEM software) and a Network module connection cable (#930930) and a USB A-B cable to connect to cpet devices.
The new Excalibur Sport with PFM

**Smarter, Better, Stronger!**

**Features**

**Electric adjustable saddle Excalibur Sport**
The position of the saddle of the excalibur sport can be adjusted in height, length and angle to suit all users.

The saddle of the ergometer can be adjusted horizontally in a range of 252 mm and the saddle height in a range of 388 mm using the Control Unit or LEM.

The Test Subject can be seated on the saddle while adjusting.

**Electric adjustable handlebar Excalibur Sport**
The position of the handlebar of Excalibur Sport is completely adjustable in height and length.

The handlebar of the ergometer can be adjusted horizontally in a range of 169mm and vertically in a range of 390mm using the Control Unit or LEM software. The Test Subject can use the handlebar while adjusting.

**Extreme low start up load 10W**
The extreme low start-up load of 10 watts and the adjustability in small steps of 1 watt make this ergometer perfectly suitable for many different applications. The standard control unit shows multiple ergometry parameters and you can determine your specific default setting and start-up menu.

**Low noise**
Due to accurate manufacturing and the careful choice of materials the product has an extremely low noise level.

**Accurate over a long period of time**
The Lode ergometers are supplied with an electro-magnetic braking mechanism of Lanooy (eddy current). The biggest advantage of this braking system compared to a friction braking system is the absolute accuracy and the accuracy over time. Moreover, friction braking systems have more wearing parts.

**Compatible with ECG and pulmonary devices**
The Lode ergometers have digital interfaces and can be controlled easily by all known stress ECG and pulmonary devices available in the world. This is one of the reasons why the Lode ergometers are very popular worldwide.

**Exchangeable pedals**
The cranks of the ergometer are suitable for almost all available clip systems so cyclists can perform a test with their own favorite pedals.

**Designed to be sweat-proof**
The housing of the ergometer is designed in such way that sweat does not have the chance to drip into the mechanical parts and cables are protected. This ensures a long lifetime and makes the ergometer insensitive for malfunction.

**RS232 connectivity**
RS232 ports enable connectivity to most ECG and ergospirometry devices as well as PC's.

**LEM compatible**
This product can be used with Lode Ergometry Manager (LEM) software to manage data and to apply specific protocols when a Communication card is present.
The new Excalibur Sport with PFM

Smarter, Better, Stronger!

SMARTER - The future is now
Adjustment of both the seat and the handlebar is possible in both a horizontal and vertical range. This adjustability can be controlled electrically through the display of the bike or LEM software, enabling easy optimization of the seating position. Moreover, the seat, handlebar and pedals can be exchanged easily for total adaption to the body posture and bike-fitting of each individual athlete.

You can extend the new Lode Excalibur Sport with the Lode Ergometry Manager Software, for faster availability of data and to simplify the analysis of the tests. The latest Lode electrics makes the ergometer ready for the future.

BETTER - It’s all about the details
The adjustability range of the New Excalibur Sport has improved considerably, making it possible for even more athletes to use the bike. The new touchscreen offers an easy user interface. You can determine yourself what data is made visible.
Furthermore, blood pressure measurement and SpO2 are available.

STRONGER - No sweat, no glory
The new Lode Excalibur Sport offers the highest performance testing with an unimaginable maximum peak load of 3000 watt! This load is fully supported by the new indestructible and sweat proof design. The bike is extremely stable and cables are protected against sweat.

## Specifications

### Workload
- **Minimum load**: 10 W
- **Maximum peak load**: 3000 W
- **Isokinetic workload control**: ✔
- **Minimum load increments**: 1 W
- **Hyperbolic workload control**: ✔
- **Linear workload control**: ✔
- **Fixed torque workload control**: ✔
- **Maximum rpm independent constant load**: 180 rpm
- **Minimum rpm independent constant load**: 30 rpm
- **Electromagnetic “eddy current” braking system**: ✔

### Accuracy
- **Workload accuracy below 100 W**: 2 W
- **Workload accuracy from 100 to 1500 W**: 2%
- **Workload accuracy 1500 - 3000 W**: 5%

### Comfort
- **Toeclips on pedals**: ✔
- **Q-factor**: 147 mm
- **Minimum leg length user**: 737 mm (29 inch)
- **Minimum leg length user (incl. adjustable pedals)**: 662 mm (26.1 inch)
- **Maximum leg length user**: 1128 mm
- **Max. leg length user (incl. adjustable pedals)**: 1143 mm
- **Vertical seat adjustment maximum**: 938 mm (36.9 inch)
- **Vertical seat adjustment minimum**: 550 mm (21.7 inch)
- **Horizontal seat adjustment maximum**: 72 mm (2.8 inch)
- **Horizontal seat adjustment minimum**: 324 mm (12.8 inch)
- **Allowed user weight**: 225 kg (496 lbs)
- **Horizontal handlebar adjustment minimum**: 229 mm (9 inch)
- **Horizontal handlebar adjustment maximum**: 600 mm (23.6 inch)
- **Vertical handlebar adjustment minimum**: 465 mm (18.3 inch)
- **Vertical handlebar adjustment maximum**: 855 mm (33.7 inch)

### User Interface
- **English user interface**
- **Chinese user interface**
- **Croatian user interface**
- **Czech user interface**
- **Danish user interface**
- **Dutch user interface**
- **Finnish user interface**
- **French user interface**
- **German user interface**
- **Greek user interface**
- **Hungarian user interface**
- **Italian user interface**
- **Japanese user interface**
- **Korean user interface**
- **Latvian user interface**
- **Lithuanian user interface**
- **Norwegian user interface**
- **Polish user interface**
- **Portuguese user interface**
- **Romanian user interface**
- **Russian user interface**
- **Spanish user interface**
- **Swedish user interface**
- **Ukrainian user interface**
- **Terminal operation mode**

### Connectivity
- **Control Unit with touch screen 3.5” for ergometer**
- **Lode interface protocol**
- **Ergoline P10 interface protocol**
- **Ergoline P4 interface protocol**
- **Schiller interface protocol**
- **Bosch EKG 506 DS interface protocol**
- **USB connector**
- **RS232 out connector**

Standards & Safety

- IEC 60601-1:2012
- ISO 13485:2016 compliant
- ISO 9001:2015 compliant

Included parts

- PC included for PFM
- Bluetooth dongle

Pedal Force Measurement

- Rotational measurement resolution: 2°
- Pedal Force accuracy from 100W: 5%
- Pedal Force resolution: 0.5 N
- Pedal Force accuracy below 100W: 5 N
